SUMMARY

Frontend developer passionate about crafting fast, responsive interfaces on top of well-engineered systems. I care about clean code, good architecture and shipping products that actually work, with a full-stack background that lets me build features end to end. Coding since 2019; I build Arabic/RTL-first products for real businesses in Iraq.

SKILLS

Languages	TypeScript, JavaScript, Python
Frontend	React, Next.js, SvelteKit, React Native, Tailwind CSS, React Query, Storybook, RTL UI
Backend & Data	Bun, ElysiaJS, Node.js, Prisma, PostgreSQL, Sanity CMS, OpenAPI + Orval
Desktop & Deploy	Tauri, PWA, Vercel, Railway, Netlify, Docker
Tools	Git & GitHub, Vite, Figma, PostHog

EXPERIENCE

Frontend Developer — Qasah · Part-time — 2024 – Present

- Design and build the frontend of Qasah's business apps: accounting, POS and Sarraf (currency exchange).
- Own the UI from design to production, including mobile-first Arabic RTL layouts and reusable components.

Accountant & Coordinator — Al-Obour Company, Kirkuk branch — 2024 · 3 months

- Handled branch accounting and coordinated daily operations and reporting with the Baghdad branch.

PROJECTS

Rasil — Multi-tenant menu & ordering platform · rasil.store — Solo · 2026 · Case study ↗

Next.js · TypeScript · Prisma · PostgreSQL · Tailwind CSS · PWA

- Each restaurant gets its own subdomain store or custom domain, e.g. naseem.rasil.store, plus a QR table menu.
- Orders go to the owner's WhatsApp with items, quantities and IQD total; no customer account needed.
- 4 languages (Arabic, English, Kurdish, Turkish) with one-click translation; installable PWA that works offline.
- Live with paying stores on a monthly plan; I built design, frontend, backend and deployment alone.

Qasah Sarraf — Currency exchange & accounting app — Frontend at Qasah

Vite · React · TypeScript · Tailwind CSS · shadcn/ui · React Query · Orval

- Built the full frontend: balance dashboard, transfers, customer statements and date filters, mobile-first RTL.
- Typed API clients and hooks generated from the backend's OpenAPI spec with Orval, fetched via React Query.

GG Systems — Game center management system — Solo · 2026 · Case study ↗

SvelteKit · TypeScript · Three.js · PWA

- Offline-first accounting, inventory and session management running fully on a local network.
- Staff open sessions, add orders and close bills; stock, records and daily profit update automatically.
- Interactive 3D floor plan in Three.js to place devices across floors, with a one-click 2D view.

Omaris — Svelte 5 component library & design system — Solo · 2026 · Case study ↗

Svelte 5 · TypeScript · CSS · Storybook

- Material Design 3–inspired components with OKLCH color tokens, light/dark modes and adjustable radius.
- Documented in Storybook and powers my portfolio site, omaris.dev, with live theme switching.

EDUCATION

B.Sc. in Dental Technology — 2020 – 2024

College of Medical Technologies

Al-Kitab University, Kirkuk

LANGUAGES

Arabic · Turkish · Kurdish · English
